Petition to the Scottish Government - Ban Municipal Waste Incineration

We the undersigned demand that the Scottish Government outlaws incineration, gasification and pyrolysis of all waste, on the grounds that these `technologies` are demonstrably unsafe for human health and the environment, and instead invests in the necessary infrastructure to make it easy and practical for people and businesses to reduce, reuse and recycle their waste, while simultaneously seeking international agreements to ensure that products that are manufactured both here and abroad are designed to enable this to happen.
